**proalign®**

ProAlign is built on ESRI's ArcGIS, the world's leading GIS software

ProAlign provides a menu with a comprehensive set of territory alignment features

Each territory is color-coded for easy identification

Optimizer automatically balances territories for you

Generate convincing maps, graphs and reports to support your alignment analysis

Easily change territories with selection tools

View hierarchy of territories and regions using the ProAlign grid

Map legend shows key map features in your view

Bar graph shows in a glance the balance level of your territories

Easily try out different alignment scenarios
